CybageKhushboo makes learning grammar fun for scholars

CybageKhushboo has rewarded intellectually curious students with a lot of benefits. One of the benefits is the interactive sessions to enhance English Language and Communication skills. Continuing the overall development, Prajakta Albuquerque conducted two more sessions for scholars on basic grammar covering prepositions and their usage on January 10 and 17, 2016.

In the first session, starting with the flashback of previous sessions on parts of speech and detailing out on each element of it, Prajakta ensured students get an understanding of the pillars of English language. She also explained the sentence construction and subject and object identification. However, most of the time was dedicated to making students learn prepositions. Through these sessions, Prajakta gave students an understanding of types of prepositions and the rules to follow for their appropriate usage with examples. She made sessions interactive to explain how prepositions work to connect sentences for making sense out of it and hence, making the language rich.

In the second session, the students got a deeper dive by understanding prepositional phrases and its difference from phrasal verbs. Students also learned various transitive and intransitive phrasal verbs. Towards the end of the sessions, students worked on interesting assignments where they performed role plays and discussed various prepositions and their usage.

Around 50 students attended the sessions and were very excited with the teaching technique used for it being interactive and interesting. Through this activity, every student is now able to make and speak simple sentences with proper preposition and grammar. The students seemed very positive about attending further sessions for further strengthening their hold over English language.
